

Travel with the business OV chip card from Mobility Mixx in 3 steps

Travel with public transport throughout the Netherlands

The mobility card from Mobility Mixx, the Mixx Card, is a business OV chip card. With this card you can easily make business trips with public transport throughout the Netherlands. Travel by train, bus, tram and metro by checking in and checking out. We are happy to explain the use of the card in 3 steps.

Some important points

We list several important points in advance for you

- Always check in and check out correctly.
- Only load the orders on your card that Mobility Mixx has set up for you.
- Don't load other products or balance on the card.
- Is your name listed on the card? In that case you are the only one that can use the card.
- Only use the card for what it is intended.
- Report loss or theft of the card immediately at Mobility Mixx.
- Make sure that you check in and check out with the same OV chip card. To prevent that another card is read, we advise you to present your Mixx Card to the card reader separately from other cards.

Other services on the Mixx Card

With Mobility Mixx you can also use other services such as business car sharing, P+R parking, book a taxi, fuel your car or rent a car or public transport bicycle. This depends on what has been agreed with your employer.

More information about the card, our other services and the terms and conditions can be found on www.mobilitymixx.com.
